## Annual Town Meet'g Friday Evening Next

On Friday evening next sharp at eight o'clock, Councillor T. Lismore, acting in his capacity as deputy-mayor in the absence of Mayor Dr. Middlemas will present the annual statement of the town's affairs during the year just passed, and all interested citizens should be on hand to hear the reports from the chairmen of the various committees of Council.

In this regard it may be well to note that the elective term of three of the councillors is now expiring. Messrs. Link, Robinson and Welch, and that nominations for their vacant seats will be sought by Returning Officer Kenny on Monday, February 7th next. The Mayor will not be required to seek office at this election, he having one more year to serve.

The Wainwright Public School Board will also present their annual statement at the same meeting, and

## National Railway Travel Bargain

WINNIPEG, Man.—An opportunity to visit friends, relatives and business associates in Eastern Canada at low cost will be afforded residents of Western Canada by the Canadian National according to an announcement made by R. Creelman, passenger traffic manager, Canadian National Railways.

These exceptionally low fares will be on sale from February 19th to March 5th and will carry a return limit of 45 days. Three classes of fares will be available—first-class, tourist and coach class. First class tickets will be good in standard sleeping car, Pullman or tourist car. Regular change for such accommodation and coach class tickets will be good for passage in coaches only.

Similar low fares will be in effect from Eastern Canada points to the West during the same period.

Mr. Albert LaPalm of Paykan is a patient at the hospital these days.

## United Ch. Choir Elect New Officers

At the election of officers of the United church choir held at the beginning of the week, the following were placed in charge for the ensuing year:

President—Mrs. W. Hittingford  
Vice-pres.—Mrs. E. Genderson  
Sec.—Mrs. G. Stodt  
Leader—Mrs. W. Clark  
Organist—Mrs. J. Tolford

## LOCAL UNITED CHURCH HOLD ANN. MEETING

The annual meeting of Wainwright United church was held in the church on Thursday evening of last week. A good crowd, representing the different bodies was in attendance.

Rev. Armstrong acted as chairman and Mr. W. S. Clark was elected secretary.

## United Artists Film Is "Tops" Picture

At the Elite for Thurs. Fri. and Sat., this week is "History is made at Night," action unquestionably a box-office hit is this latest Walter Wanger production, possessing as it does every essential for the best in entertainment and more important, profit. A touching love story for those who want romance ably combined with plenty of action, spectacle and mystery for the fans desiring more hardy film fare. Results: A picture sure to score solidly with any type of audience and in all its runs. Jean Arthur wins top cast honors with Charles Boyer contributing his best performance to date. The story depicts the love and tribulations of a suave head waiter and the abused wife of a shipping magnate. Leo Carrillo contributes his usual dependable touch of comedy relief.

Miss M. Fish is on duty as a special nurse at the hospital.

## Awards on Display For 'Spil' Winners

On display this week in the Washburn Hardware window, the splendid array of prizes which will be awarded to the winners in the four events make a tempting show, and will no doubt be striven for to the utmost.

The prizes are as follows:

**Grand Challenge**  
(The Maryland Trophy)  
1—4 Buffalo robes; donated by Buffalo National Park.  
2—4 Serving Trays donated by Weller & Williams, Edmonton.  
3—4 Coffee Pots; The Curling Club.  
4—4 Curling Brooches; The Club.

**The Jackson Trophy**  
1—4 Club Bags; donated by Wainwright Gas Co.  
2—4 Bets Gent's Brushes; donated by King Edward Hotel, Edmonton.

3—4 4-gal. Cans Marvelous Oil; donated by Wainwright Motors.  
4—4 Flashlights; The Club.

**Wainwright Light & Power Trophy**  
1—4 Electric Table Lamps; donated by Calgary Power Co.  
2—4 Silver Plates; donated by Lincoln Hotel, Edmonton.  
3—4 Vases; donated by Bonspiel Committee.

4—4 Pyrex Dishes; The Club.  
Edmonton Brewing Trophy  
1—4 Radio Lamps; donated by Wainwright Hotel.  
2—4 Butter Dishes; donated by T. Eaton Co., Winnipeg.  
3—4 Shaving Sets; The Club.  
4—4 Rubber Door Mats; donated by Brunker Service Station.

As will be noted elsewhere in this issue the above prizes are being played for as we go to press. A full list of winners will appear next week.

## Edgerton Jewelry Comes Wainwright

A proud bunch of curiers marched up from the depot last week end, for these boys had returned from the Edgerton bonspiel loaded with the spoils of victory!

The local risk which attended the affair was comprised of Messrs. Michon, Howarth, Anderson and Vic. Cowley (skip) and they are now happy in the possession of the awards for winning first prize in the Grand Challenge Secondary as well as taking second prize in the Red & White trophy event. Congratulations!

## New Hockey League Formed In Wainwright and District

The local Forts hockey team journeyed to Hughenden on Friday night and after an exciting game, emerged on the short end of a 10-3 score.

The Hughenden boys very sportingly loaned the Forts two players in order to complete the team.

For the locals, Bond secured two goals and Kenn T. scored one on a very playful play from the face-off. The Hughenden goals were too numerous to mention individually. Those making the trip were:

## China's Need— Canada's Answer

Sir Henry Drayton, chairman of the National Red Cross, sends us the following:

Both Japan and China were tendered medical and relief assistance by the International Red Cross, representing all National Societies. Japan declined, stating that she had already made necessary provision. China, accepted, with a gratitude that reflects her terrible need.

China is suffering. The extent and severity of that suffering has yet to be known, if ever, found equal in the history of nations.

The shelling and bombing of cities, bringing terror, death, and displacement to millions of people, and to countless women and little children helplessly caught in the maelstrom of war, have created distress of unparalleled proportions.

At the expressed wish of Canadian citizens in many parts of the Dominion, the Red Cross and the Religious Bodies of Canada, in affiliation, are creating a fund, through which our people may express their sympathy in tangible form.

No brief is needed for this appeal. Day by day, press and radio are laying the stark facts of this great tragedy before us. The need for kindly assistance will never be greater. In the face of suffering such as theirs, our sympathy and help can know no barriers of race or creed. We feel confident that Canada will meet this need promptly with generous hand and heart.

Mr. and Mrs. Tom Heathfield are spending a few days in the city on business this week.

Hickey, Tory Therber, Devignon, Abbott, C. Tory and Bond.

The newest development in sport in the Wainwright district, is the formation of the hockey league, comprised of teams from Balzac, Alberta, and Orndale, in the Northern section, and Paschenedale, Roseberry and Alma Mater in the Southern division. The teams play twice a week with finals in each division, and a play-off for the League championship between the North and South finalists. We understand that the Irma business men have donated a cup for competition in the league. C.A.H.A. rules will govern the games.

In games so far that we have heard of, Alma Mater and Ashburndale played to an overtime tie at 3-3, and in a league game Roseberry turned back the smooth-working Paschenedale crew to a 4-1 score. The league is creating plenty of interest in the district.

There are rumors of an Intermediate Hockey Tournament to be staged locally in the near future if sufficient interest can be aroused in town. According to present plans, this would bring together teams from Irma, Vermilion, Hughenden and Wainwright, and would provide local fans with some classy hockey entertainment.

The sk-hill at Paykan has become the mecca for those who care to take their sport on the fly, and each Sunday afternoon sees a bigger turnout. If you haven't been out yet, tie on a pair of skis or climb aboard a toboggan and join the fun.

## LOCAL NOTES

Calvin Coolidge made the largest number of appointments of any president of the United States; they totaled 42,121.

Among the visitors to the city last week was Mr. and Mrs. Bob Jones for a few days stay.

**Monday Evening**  
(8 p.m. draw)

The following are play-down results as noted:

## WEDDING BELLS

The pastor of St. Andrew's (Pres.) church, Rev. W. S. Brooker, solemnized the marriage of Miss Doris Ethel Bonner to Mr. Donald Raymond Stewart, both of Wainwright, at the church on Thursday evening last at seven o'clock.

Miss Doris V. Bonner, twin sister of the bride acted as her maid, while the groom was supported by Mr. Harold Wiley, a number of immediate friends and relatives of the happy couple being in attendance.

## New Machines Alberta Roads

Purchase of the latest road oiling equipment is likely to be made by the Alberta government this year in carrying on its proposed 400 mile surfacing program.

The minister of public works, Hon. W. A. Fallow, is inspecting types of this equipment while on a visit to Chicago and St. Paul.

Some time ago it was reported that the province may purchase \$200,000 worth of new road machinery this year. Last year two oiling machines were purchased, but on account of the improvements in equipment which have been made since that time, it is likely that these machines will be turned in on the purchase of four or five of the more modern type available for this year's operations.

Oiling of the highways forms the first course of hard surfacing, which has long been advocated by the Alberta Motor Association and other organizations.

Experience has shown that the oiling blotter treatment must be followed up by the second course of seal coat, giving a finished hard surfaced highway, which is what tourists demand these days. This also is the type of work that provides pleasant driving for Alberta residents.

Mrs. Jack Stinert is away to Drumheller on a visit to her sister Mrs. Jack Blason.

## Every Tax Body Get's in On Oil

The cumulative taxation on the oil industry, the most heavily taxed of all the great industries, has reached the stage where it has affected the ability of some units, particularly the independents, to expand their operations, and to meet the increasing demand for petroleum products.

There is a tax, sometimes two or more, on every phase of their business, on what they sell, and on everything they buy. What they buy costs more because of increased taxation on businesses which supply the oil industry.

As an example take the case of Texas. Instead of oil being taxed 2 1/2 per cent of its sale value, as popularly supposed, the average barrel of oil produced in the State carries a direct tax load of 5.5 cents. In 45 counties the average state and county tax is 10.9 cents and in 20 counties it ranges from 11 to 14.7 cents a barrel. This is because of the system of multiple taxes levied by the state, counties, school districts and other subdivisions.

More than a dozen different kinds of taxes are levied on the production of oil. Gasoline is being retailed in Texas today for the same price as 15 years ago when crude was \$2.50 a barrel. The producer is now getting 50 per cent less for his crude but taxes eat up the difference.

The oil industry has carried the increased cost of labor, which was already shown above the average, greater outlay for material and supplies and the mounting multiplicity of taxes. This handicap cannot be carried indefinitely.

After a full week of evening struggle for supremacy, the large number of curiers entered in the mixed bonspiel in town came to the wind-up last week, and all expressed themselves that it had all been enjoyable.

Some three dozen risks started out in the 'spiel, and these were gradually eliminated until in the primary only the Cowley and Springfield risks were left, while on the secondary side of the draw about the Keenan and J. Mackenzie risks were still in the running.

In the finals the primary event

## Radio License To be Increased

OTTAWA—Radio license fees will be increased 50 cents, to \$2.50 for the fiscal year starting April 1, it is announced by Transport Minister Howe.

The new regulations also provide a separate license will be required for each receiving set, the present arrangement, permitting a license to cover a house and a car radio, being cancelled.

The minister said the increased revenue "is required to enable C.B.C. to carry out its program of expansion, particularly in the direction of better programs and more complete coverage."

## Tourists Spend Large Amounts

Tourist money should be attracted to Alberta in great volume this year, providing that a major effort is made to facilitate the movement of this traffic northward from the U.S. boundary.

Just what the tourist means to business in this province is demonstrated in the following instance: A motorist from the United States, accompanied by his wife, drove to Calgary and expressed the desire to visit Jasper Park, but decided, on account of reports of road conditions to turn back. While in Calgary, he bought an overcoat, suit and other articles of clothing for himself and his wife amounting to \$150. Had road conditions been better, he would have remained in the province and spent a great deal more here.

With highways improved to the extent that tourists would drive over them in comfort and safety, there would be a great inflow of visitors and Alberta business would be stimulated as a result.

Every dollar spent on hard surfacing will yield returns several times over in excess of the original outlay, in the opinion of officials of the Alberta Motor Association.

Thus it is expected that the forthcoming session of the Alberta legislature will result in appropriations being passed that will mean big highway improvements in this province.

## Wainwright Bonspiel Is Now in Full Swing

This week sees the annual Wainwright bonspiel in full swing, and with the two-drawn risks entered much enjoyment will no doubt be experienced by those who take their pleasure from the "broom and stane!"

The bonspiel committee, Messrs. Schlitt, Michon and W. Cowley, have worked hard to make this annual event an outstanding affair, and with risks entered from far and near competition for the many splendid prizes promises to be keen.

In addition to town risks skipped by Messrs. Mitchell, G. Clark, V. Cow-

ley, Bill Cowley, McBride, Brady, Prickleton, G. A. Murray, Telord, Alderman and Schlitt, entries have been made by Messrs. McPadden, Chauvin; Challenger, Edgerton; Cley, Edmonton; Dewar, Scott (Sask.); Rutlan; Hendar; Bond; Greenshield; Jones; Hughenden; Mills; Trafalgar.

Four events will feature the three-day 'spiel, and the first draw was held on Monday evening, play commencing immediately after these were known.

The following are play-down results as noted:

## Mixed Bonspiel is Now Thing of Past

was taken by the risk composed of Miss D. Glas, Mrs. H. Seaton and the Keenan and J. Mackenzie risks were still in the running.

The secondary event was won by the risk skipped by Mr. W. Keenan who had as assistants Mrs. H. Taylor, Mrs. A. Horna and Mr. G. Glas, who managed to edge out the Mackenzie risk (skipped by Mr. T. Lane) composed of Miss L. Prosser, Miss M. Beckett and Mr. J. Toimie for the honor.

## HOW TO GET RID OF: THE RAT

TODAY &  
TOMORROW

Frank Parker  
Stockbridge

**MOTTO** marks faith. Driving over the new Merritt Parkway in Connecticut a short time ago I noticed that on the pillars at each end of the railings of all the bridges there was a decorative design with some lettering, apparently in Latin. I stopped long enough to read the motto. It is: "In transitu, sustinet." The best rough translation I could make was: "He who brought us across sustains us."

What a splendid motto for a bridge! I thought, I said as much to a friend who replied: "Why, that design on the bridges is the Great Seal of the State of Connecticut, and that is the state motto."

It is nice to think about the clear, simple and unshakable faith of the early colonists in the power of God to protect and preserve them. "He who brought us safely across the ocean, still protects us," might like that seems rare today; and aren't most of the troubles of our nation and the world today due to a lack of faith in the power and wisdom of God? I think that is so.

**TRUST** in *divinity*

The United States of America has two mottos. The one on the Great Seal is in Latin, and reads: "E Pluribus Unum," which means "from many, one." The other, the union of states into a nation. But a more familiar, national motto is the one stamped on the silver coins: "In God we Trust." The founders of the Nation believed in God and in His power to guide and protect the new nation. When the Constitutional Convention of 1787 was about to break up, the state jealousy and distrusts, Benjamin Franklin suggested that the delegates pray for Divine guidance. His plea was effective. Petty differences were sunk, and, under the inspiration of the daily prayer the Convention drafted the charter of a new nation.

But how much do we Americans these times put such reliance upon Divine guidance, such faith in God? Does the motto on our coins mean the same to politicians of 1937 as it did to those of 1787?

I believe that some leader in public life could swing the nation back to the faith of the founders, that those who administer the nation's affairs put more trust in God and less in man-made devices and schemes.

**CO-OPERATION** with God

The trouble with many people is that either they have no trust in God at all or they have too much. I have never been able to believe that mere faith in God is enough under the Divine plan, and that co-operation with God is the only way to success. I believe that the only way to success is to co-operate. Oliver Cromwell had the idea when he ex-

# Nancy Hart's HOME NEWS

**CRANBERRIES**, like Indian corn, are native to this country and long have held a high place among the fruits of the North. They grew wild on the lowlands of Cape Cod and the Pilgrim families used them for holidays and festive occasions.

The Indians had recognized the healthful qualities of the berry although they had no idea that vitamins, iron and calcium were in the virtues of the berry. Red berry.

For centuries the cranberry of today is a vast improvement over the native wild berry. Cultivation has improved the taste and greatly improved its flavor.

These berries keep excellently and can be stored for months and are full flavored for a long time. However, kitchen experiments have shown that if you freeze them, the stiffer the jelly, so if you want to make cranberry jelly to keep in the refrigerator, make it early in the season.

**Salads, puddings and relishes** are made from the berries. Sugar should not be added until the fruit is cooked tender. This method produces a more tender berry with flavor and requires a minimum of sugar. The full amount of the full value of their nutrients, the fruit should not be cooked too long.

**For the winter** the cranberry sauce or cranberry jelly with turkey but there's no reason why you can't have it with the roast pork and veal. The tartness of the fruit makes a fine contrast to the meat for almost all roasts and fowl. Try it with roast pork.

• • •

**Brighten up your costume** with a gay caplet. Cardinal red, burgundy and black are the colors which are combined with tawesty, leather and metals to make attractive costume. These colors are worn on occasion or for every day use. Round ones called "bush hats" are designed with tawesty and are designed for afternoon and evening wear.

**Barclay Square** and decidedly modern in style are stunning for shopping.

## Wainwright Machine Shop

BOB. LEGGETT, Prop.

THIRD AVENUE

**LISTEN...**  
*on Friday Night*  
**"CANADA-1938"**  
IMPERIAL TOBACCO'S  
INSPIRING PROGRAM

**FRIDAY 8 P.M. M.S.T.**  
CJCA - CFAC - CJOC - CFEN  
CKBI - CFQC - CKCK

horted the soldiers of the Commonwealth before the battle of Naseby, "Trust in God, my boys, but keep your powder dry." Three hundred years ago Algernon Sidney wrote: "God helps those who help themselves."

the trust in God which our forefathers had and proclaimed, to all the world, was simply faith that if they lived righteously, dealt justly, and did all they could to help themselves, they would be helped and sustained by the Divine Spirit, lacking which men lose courage and belief in themselves. The old spirit of America speaks in the last stanza of the National Anthem:

"Then conquer we must, for our  
cause it is just  
"And this be our motto: In God  
is our trust."

That spirit has kept the Star-Spangled Banner waving for 150 years.

**FAITH** in the self  
Faith in Divine guidance, these  
Americans of old understood, is  
faith that if one does his best to  
obey the laws of the moral code of  
right conduct which are the founda-  
tion of all religions, he will gain  
moral strength and courage to face  
hardship without complaint and to  
persevere in the face of adversity.  
They did not believe in per-  
sonal miracles, nor do I.

The root of faith which some peo-  
ple, that they are particular peo-  
ple, have, is superstition. It is a  
belief that by certain acts, or by  
taking any precautions against illness,  
financial difficulties or any other  
disaster, seems to me more like silly  
superstition, than it is like faith.  
I have the realization that if one so  
orders his life as to win and retain  
the confidence and respect of like-  
minded people he need have no fear  
of being overwhelmed by untoward  
circumstances.

Faith in God, is, after all, faith in one's self. The Divine Spirit is inside of ourselves. If it is not, we are lacking in confidence and courage; if we have it and live by it we are not afraid of anything.

**FRUITS** . . . of the spirit

Much confusion and wrong thinking arises from the concept of God as a humanlike individual demanding obedience to arbitrary laws. The best definition of God that I know is in the Westminster Catechism, which says that He is "a spirit, infinite, eternal, and unchangeable in His being; wisdom, power, holiness, justice, goodness and truth."

A spirit with those attributes moving the hearts of men controlling the destinies of nations is what all the great religious teachers have tried to make people understand and believe in. The conception is the fruit of ages of human experience. And when people are guided in their lives by such a spirit, followed by a faith, with which the government governs men and all liked people of a community, state or nation imbued with that Divine Spirit would indeed be the happy land of which our fathers dreamed when they adopted the motto: "God, Trust and Liberty." Love, peace, long-suffering, (in the sense of patience), gentleness, goodness, faith, meekness, temperance are, St. Paul tells us, the "fruits of the Spirit." Anyone can have them for himself, as every American had them, since for the great nation America would be."

## AUDITOR'S REPORT

January 14, 1938.  
To the Mayor and Council,  
Town of Wainwright,  
Wainwright, Alberta.

Gentlemen :

We present herewith Financial

Statements of the Town of Wainwright for the year ended December 31, 1937.

We have audited the accounts of the Town of Wainwright for the year 1937 and have found all receipts properly deposited and all

payments properly authorized and in order. We have found the Tax Rolls properly balanced and all records well and properly kept.

All required information has been readily available.

We shall be pleased to supply any

further information desired at any time.  
All of which is respectfully submitted.

PATRIQUEN & JOHNSTONE,  
Chartered Accountants

Pattern 8097 designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 3 1/2 yards of 39-inch material; with short sleeves 3 1/2 yards.

## SILHOUETTE IS CORSELET

Pattern 8097. Look your most charming, feminine self in this frock designed for figure flattery. The wide girle gives wasp-like proportions to the figure and the softly skirled bodice lends becoming softness to the whole silhouette. Sleeves are long and straight and softly skirled to give a high, squared-shoulder look while the skirt is straight, flaring slightly toward the hem.

For Pattern, send 15 cents in coin (for each pattern desired) your NAME, ADDRESS, STYLE NUMBER and SIZE to Patricia Dow, (Wainwright Star) Pattern Dept., 115 Fifth Avenue, Brooklyn, N.Y.

The quality of the sleep we enjoy is more important than the quantity. Slumber disturbed by dreams is a sign that the brain is still active.

CHEMISTRY OF THE FARM  
CELEBRATING A JUBILEE

One of the most notable jubilees in the history of agricultural chemistry was celebrated on October 1, 1937, by Dr. Georg Wimmer, present director of the agricultural experiment station of Bernburg, in Anhalt, Germany, marking 50 years of activity in the same research centre and, amazingly enough, in the same rooms in which he received his early schooling. The building was originally the Bernburg academy which Georg Wimmer attended up to the time of his graduation, when it was converted to the use of the experiment station, and here on October 1, 1887, he was appointed assistant to Helriegel. Together with his revered instructor, he took part in the epoch-making investigations of the assimilation of nitrogen by legumes, through the medium of their root-nodule bacteria. Later, in association with Helriegel's successors, Wimmer and Krueger, he applied himself to diverse research work, notably in the domain of sugar beet culture, which brought world renown to the experiment station of Bernburg.

The foregoing is translated from the German of Dr. P. Kriecher, Berlin, by B. Leslie Emalie, the Canadian fertilizer authority who, during his two years in Germany, paid frequent visits to Bernburg, was privileged to number Wimmer and Wimmer among his friends and was assigned the task of translating into English several reports and bulletins issued by those outstanding agricultural chemists. One of the works translated was "The assimilation of the elements of nutrition by plants during different stages of their growth."

## Co-workers in Science

True comradeship among scientific research workers amounts to geographical frontiers and ignores political party lines. It is remarkable to contemplate the interwoven records of achievement in the field of agricultural chemistry. A notable chronological coincidence is that the same year in which Dr. Wimmer joined the staff at Bernburg marked the appointment of Dr. Frank T. Shutt as first Dominion Chemist at Ottawa. That was in the golden jubilee year of Queen Victoria. In 1888 Dr. Shutt visited Europe for the purpose of studying investigations at Rothamsted, England, Bernburg and other continental experiment stations, and formed lasting friendships with Lawes and Gilbert and other eminent agricultural scientists in Europe. Then the echoes of Helriegel and Wimmer's discovery of the nitrogen-fixing power of legumes still vibrated and impressions received by Dr. Shutt on that occasion were interpreted by him for the benefit of Canada agriculture. Of inestimable value are the results of his investigations with clover, which proved the value of the plant as a nitrogen gatherer in the crop rotation and indicated the need for only phosphate and potash in the fertilizer supplement.

Children are not to be scolded or blamed for their food dislikes. The parents are wholly responsible. The child's likes and dislikes are the result of the training which he has received from his parents, whom, after all, he did not select. By proper training, it is possible to have children who like simple, wholesome foods.

## By MOLLY MARTIN

Dessert is a man's dish. Yes! I know it is often regarded as a woman's dish, but eliminate it from your menu for a few days and you will soon see that more comfort comes from Dad than from Mom or Donald or Doris.

A meal without a dessert is a meal without baseball or a fishing trip without fish—so far as Dad is concerned.

Really, the dessert may be made of the most valuable dishes of the meal. And light fruit and milk puddings and custards can work wonders.

Through such desserts milk and cream are furnished to children and adults. These valuable foods are in the form of the most palatable and nutritious meals, salts, vitamins of fruits are supplied to children and adults.

Oranges and grapefruit are particularly valuable foods. Contrary to the belief of some, they have a cooling alkaline reaction when they enter the system, and thus they balance acidities from food that may be eaten during the meal.

Prepare a meal either with fruit or orange juice in a very simple manner. Finishing the meal with light pudding such as the lemon juice or orange juice pudding type. I submit this recipe to

## HEALTH

A HEALTH SERVICE OF THE CANADIAN LIFE ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

## FOOD LIKES AND DISLIKES

How may a child be taught to like the food he should eat? We all like foods to which we are accustomed. It is for this reason that it is essential to begin in infancy to accustom the child to the taste of desirable foods which he will then like throughout life because he is accustomed to them. Cereals are introduced into the diet of the infant before the sixth month; vegetable juices shortly after. Other foods in small amounts at first, are gradually added. If this is done, by the time the child is two years of age, a good start will have been made.

Our likes and dislikes are largely a matter of imitation. We begin to eat olives because we see that others eat them with pleasure, that indeed they regard them as a luxury. The attitude of the parents to different foods is largely the attitude the children will have. If parents cannot train themselves to eat and enjoy desirable foods, and so set a good example, they cannot expect to train their children to do so.

Children want to drink tea or coffee because they see their parents drink them with some relish. The same desire can be cultivated in the child for any foods, through the example shown by the parents.

It should be a fixed rule never to talk about the food dislikes of a child when he is present. Refer to his likes, if something about food must be discussed, but never to his dislikes. Such discussions, or the display of feelings, even without words, fix the dislikes permanently in the mind of the child.

When a new food is given, there should be no fuss about it. Serve a small amount and act as if the child would eat it, as if he were now old enough to have this adult food.

Foods should be served in an attractive manner. Meals should be at regular hours and time taken to enjoy each meal. Give small servings and repeat, rather than one very large helping.

A dislike for bland foods, such as milk, frequently means that the child is having too much of some sweet foods, or of foods with a very distinctive flavor. In such cases, all sweets and highly flavoured foods should be withdrawn for a few days.

Children are not to be scolded or blamed for their food dislikes. The parents are wholly responsible. The child's likes and dislikes are the result of the training which he has received from his parents, whom, after all, he did not select. By proper training, it is possible to have children who like simple, wholesome foods.

## The World of Wheat

By H. G. L. Strange,

Director, Research Department, Searle Grain Company, Ltd.

"Should I continue with Garnet wheat, or should I use a different variety? If a different variety, then which one?"

These are questions that are disturbing those farmers who now depend upon Garnet for a living. It is true that over 200 million bushels of Garnet, mixed in No. 2 and No. 3 Northern, have in recent years been bought and used by millers, and bought, moreover, at relatively good prices. Yet very little pure Garnet, under that brand name, has so far been sold. What the price of Garnet will be when offered only under a special "Garnet" grade name therefore remains to be seen.

For those who desire to change from Garnet to another variety, and who operate in north-eastern Saskatchewan—a rust area—I suggest that Thatcher might be considered, for while it is seven days later than Garnet, yet it is three days earlier than Marquis. Fertilizer would make

the Thatcher still earlier.

For north-western Saskatchewan, and for the whole of Northern Alberta, where rust is not a menace, Red Bobs, being six days earlier than Marquis, has much merit. Some farmers have even found that Marquis with fertilizer is early enough for certain areas.

Reward is a high quality early wheat, but the yield, unfortunately, is rather low.

Following factors have tended to raise price—U.S. Department of Agriculture reduces world wheat production estimate—Kansas winter rye acreage smaller and condition lower than a year ago—Reduction in Japanese rice estimate—Small corn surplus remains in Argentina—Argentine corn crop needs moisture—South African wheat crop smallest in number of years.

Following factors have tended to lower price—Australia offers wheat freely—Danish wheat, oats, barley and rye production larger than last year—Compulsory admixture of potato flour in bakery products throughout Austria—Increase in Japanese cane sugar production—European crop outlook better than a year ago—Curtailed consumption and use of substitutes reduces wheat buying.

Canadian paper mills produced 301,106 tons of newsprint during October of last year a new all-time record.

## Dale Carnegie

5-Minute Biographies

Author of "How to Win Friends and Influence People."

HELEN JEPSON  
A Darn In Her Stocking Set Her Feet On The Ladder To Fame

Do you like Cinderella stories? Well, here is one that actually happened. This is the story of a little girl who was once called "Fat," but who grew up to be one of the most beautiful singers of all time. This is the story of a little girl who was so poor she couldn't afford to take music lessons; yet she is now a prima donna in the Metropolitan Opera Company in New York.

In 1930, this girl had one radio audition after another, and nobody wanted her. Four years later, the radio editors of America voted her the most important new radio personality of the year. One season while I was broadcasting I often admired a beautiful platinum blonde sitting in the front row of the studio audience—a glamorous blonde with soft brown eyes, a stunning figure, and personal charm that drew the eye. I discovered she was none other than the famous Helen Jepson, and that she was the wife of George Fossell, the flute player in the orchestra.

I asked Helen Jepson what was the most astonishing thing she knew about herself and she said: "Well, most people are surprised to know I am married and have a child."

When her baby was born, the nurse in the hospital put an identification tag around the baby's neck—a string of beads with the baby's name on it. Miss Jepson has had that string of beads made into a bracelet and she wouldn't dream of singing without wearing that bracelet.

If Helen Jepson hadn't sung Carry Me Back to Old Virginia, she might still be selling corn in the musical world. It happened thus: She had always longed to be a singer. In high school, she had been a star performer in the glee club; after she graduated, she got a job selling

soup for dinner; but they sang songs from La Boheme and imagined that they were in Paris. Hardships! Not a bit of it. They were having the time of their lives.

One of the things I admire most about Helen Jepson is the fact that success and fame and money haven't spoiled her. She is just as democratic and unassuming now as she was fifteen years ago when she was sweeping the floor and trying pork chops for her father back in Akron, Ohio.

## MODERN WOMEN

EARLENE WHITE  
President of The National Federation of Business and Professional Women's Clubs, Inc.

A chemical formula has been discovered by two artists which, it is thought will revolutionize mural painting, for by keeping the walls from getting dry they work longer. This achievement is credited to Elizabeth de Vecovi Whitman, a young New Yorker in cooperation with a Mexican chemist, Miss Whitman, now only twenty-three, is a pupil of Diego Rivera, who is enthusiastic about the use of the new spray which permits an artist to work on frescos for fifty-six hours. In all these years, Miss Whitman has painted his marvelous murals. It has been impossible to work for a longer time than twenty-three hours before the materials dried.

The first woman to be officially named its outstanding citizen by the people of Troy, New York, is Miss Emma Kellar, principal of Emma Willard School. She has received a plaque, awarded each year by Temple Beth El Brotherhood, to the person who has done most for the city.

The highest salary paid to a woman in a local government office is \$12,000 to Miss Martha Byrne, Register of New York County. Mention is made of this in the National League of Women Voters' latest edition of its "Survey of Women in Public Office." The survey gives honor to Miss A. Vela Smith, American Trade Commissioner at Shanghai. Miss Smith was sent to China in 1920 first to Peking and two years later to Shanghai.

## AMONG THE OLD-TIMERS

"REMINERS OF OTHER DAYS"

## TEN YEARS AGO

Owing to the breaking of one of his lines, Mr. A. Whiston had the misfortune to have his milk wagon upset, spilling considerable of the contents.

Superintendent A. G. and Mrs. Smith left at the weekend on a business and pleasure trip to Ottawa.

Mr. J. Wylie arrived from Regina to take charge of the local coal dock.

Following a long residence here, Mr. Jacob Gehring, passed away Wednesday morning early at the age of 87 years. He had been ill for several years.

The race meet held on the local ice by the Elks attracted a large crowd of sport enthusiasts. Winners were as follows: Geys, O. Brown, G. Kenny; Ladies, Mrs. Western, M. Fraser; Girls, M. Steel, M. Retch; web boys, D. Wallace, R. McKelvie; web girls, H. Wiley, D. Tansley; blind race, C. Torsy, E. Pickard.

Mrs. C. Ward and Miss C. Foster left on Sunday for a short holiday at Edmonton and Jasper Park.

Mr. Alex Murray was taken to Edmonton for specialist medical treatment.

When his horse fell, Mr. C. Powell, of Gilt Edge, was quite badly bruised on Friday last, and he also received a nasty gash in the face when the animal kicked him in an attempt to get up.

The members of the Odd Fellows lodge were "at home" to the Reddells and their friends last week when they celebrated the anniversary of the founding of their Order. The Elks theatre was very prettily decorated for the occasion and Stott's orchestra supplied the music for dancing, with Mr. W. C. Bowen and M.C. Supper was served at midnight.

## ALICE STEVEN'S HOME SERVICE

Do you find pie and pastry hard to digest? They are frowned on by many food specialists. One reason is that they are not used wisely. They should not be served at the end of a heavy meal. Sedentary people do not need pastry as their activity is not sufficiently great. Pastry should be avoided in the diet of children. However, you can use pastry in your diet if you use it in wise combinations and you are doing active work.

Tender flaky pastry is more easily digested than soggy pastry. There is no question as to which is more pleasing. Practice is one of the main essentials but here are a few simple rules that will help you.

Temperature proper one of the most important points. The ingredients should be chilled. The sudden change of temperature into the hot oven causes the pastry to expand and the water to change into steam. There is no leavening agent as in the making of cakes.

Too moist a pastry is one of the common causes of failure. The usual proportion is one-quarter cup of fat and the same or even less of water to one cup of flour.

The flakiness of pastry is increased by proper manipulation. Work in the fat, so that the fat and flour will form layers. Try to work in as much air as possible. The fat may be worked in with the fingertips but this heats up the pastry. A pastry mixer or blender is better.

In making puff pastry, butter is used as the fat. The salt is washed out of the butter first. The pastry is kept at a very low temperature.

Many people find that they get better pastry by working in only one handful over the pastry and rolling it in. Roll out the pastry and dot with a part of the fat. Fold over so that a layer of air is enclosed. Press the edges together. Repeat this several times and this alternate doing and rolling increases the layers of air.

In making apple pie the apples may be cooked into applesauce and then baked in the raw crust. A hot oven can be used for this because the apples are already cooked. There is frequently trouble with the undercrust of an apple pie being soggy. A strong undercrust in the oven helps to overcome this. Many deep apple pies are made without an undercrust. Mix a little flour with sugar sprinkled over the apples. This helps to absorb the surplus juice.

## APPLE PIE

1 cup flour  
1/2 teaspoon salt  
1/4 cup fat  
1 Cold water  
4 or 5 apples  
1 1/2 cup sugar  
1 teaspoon butter  
Spice  
Sift the flour and salt. Cut in the shortening. Add cold water and roll. Line the pie plate with one half the pastry. Peel and cut the

## TWENTY YEARS AGO

Mr. J. M. Patterson arrived in town at the week end from Edmonton to take up a position in the Wainwright Pharmacy.

A deal was completed last week whereby the drug business belonging to Mr. H. Pettigrew became the property of Messrs. Livingstone and Harden.

Mr. Chas. Davies of the G.T.P. staff was taken ill and rushed to an Edmonton hospital.

Mr. Ed Ripley, the "block man" for the International Harvester company arrived in town on Monday where he will take up residence.

Having spent the better part of the winter in Ontario, Mr. S. R. Bowerman returned home this week.

Mr. W. Harrison, brakeman on the G.T.P. had his fingers badly smashed while coupling cars. He was taken to Edmonton for attention.

Having disposed of his business, Mr. H. Pettigrew left to join his family in Winnipeg, where his wife was under the doctor's care.

apples into very thin slices. Sprinkle with sugar and spice and dot with butter. Moisten the edges of the undercrust. Cover with the upper crust which has had some cuts made into it. Press the edges together. Bake 40 to 45 minutes in a moderate oven.

## SYDENHAM

Mr. and Mrs. T. Croteau accompanied by his brothers spent the week visiting with Mr. and Mrs. R. Croteau in Lethbridge.

Among those who journeyed to Edmonton this week were Mrs. F. Plust, G. Glenn and L. Stadschaug.

Miss Pauline Dixon spent a pleasant time on Thursday entertaining her young friends, the occasion being her eleventh birthday.

Mrs. Glenn spent the week at the home of Mr. and Mrs. O. Croteau.

The Sydenham Mutual Telephone Company held their annual meeting on Friday at the schoolhouse. The new directors are: Messrs. W. Woodward, S. Merrick, J. W. Fraser and C. Alexander. Mr. L. Bein, president; Mr. L. Kilbride, secretary; treasurer. The meeting was well attended.

## GREENSHIELDS

Spring must just be around the corner for on Monday morning Mrs. E. Harrington saw a crow resting on a tree near her window.

On Friday last Mr. and Mrs. Howard Murray were hosts to the district at a wedding dance. After lunch the bride and groom were presented with gifts by their neighbors and friends, wishing them a happy married life.

## Sheepskin Flats

We are pleased to hear that Mr. Wainwright is very much improved in health than he has been for some time.

The skaters met again Sunday last at the rink and a good time was enjoyed by a large number.

The sawdust flew on Mr. Templeton's farm on Monday when he worked on a large pile of wood.

Mr. Elmer Johnson was taken to the hospital on Monday last. We wish him a speedy recovery.

Now is the time of year to build cupboards, sinks, wardrobes, lay new floors, and make your wife's work easier and more pleasant. This work can be done now while labor and materials are cheap. Any assistance we can render will be cheerfully given and estimates are free. Atlas Lumber Co. Joe Welch, mgr. Phone 57.

## CHECK YOUR ADDRESS LABEL

It will tell you how you stand in respect to your subscription to The Star. We do not rely on the task of continually reminding our readers, but it becomes necessary. If you are in arrears the sum may seem insignificant to you, but to The Star a far different picture is presented. It is difficult to carry on these times, and hence it becomes necessary to remind our readers of their obligation. See our clubbing offer.

## The Legion Notice Board

We are in receipt of a letter from our comrade President Gordon Graham stating that he is in bed and does not know how long they are going to keep him there, and reading between the lines, one senses that the old army game of "treat 'em rough and tell 'em nothing" still has its exponents. However, he asks that we convey his best wishes to all comrades and we know that they are most fully reciprocated.

Next week end will see the opening of the big Dominion Convention at Port Williams. Comrade Lt.-Col. E. Fitzman of Charlottetown is representing this branch as well as his own, and when the dust has settled we shall, no doubt, have the pleasure of reporting on the report.

As we have mentioned before the principal business before the convention will be the report of the Veterans' Assistance Commission. We have had the privilege of reading this report in the form in which it will be presented at the convention and one recommendation contained therein appeared to us to offer a practical solution. It was to the effect that all railroad level crossings, particularly on main highways, be guarded day and night by ex-service men.

The recommendation suggested three men to each crossing, working in eight-hour shifts and went on to explain that some solution of the problem had to be found and although the scheme of crossing guards might be expensive it would cut down the appalling death toll by only 50 per cent, be money very well spent indeed.

As we go to press we would like to ask all members to watch this column next week for particulars and if it cut down the appalling death toll by only 50 per cent, be money very well spent indeed.

## The DIAL REVIEW by Walter Dales

The Kraft Music Hall, aired Thursday nights at 8 o'clock, over CICA, is emceed by Bing Crosby. Bing—who is so color blind he once attended a wedding wearing full dress and a bright red tie—proves he's far from tone deaf. Bing goes for John Trotter's Orchestra boys, but you will have to make up your own mind about Bob Burns and his bazooka solos!

CICA's Sunday schedule is brightened by Jack Benny and the Jell-O program, heard at 5 p.m. Leading the list of favourite comedians for years, Benny shows no signs of weakening. Kenny Baker, Mary Livingstone, Phil Harris and his Orchestra, even Announcer Don (six-delicious-flavours) Wilson contribute sparkling wisecracks.

Whether it's songs you like, or laughter, you'll enjoy the Chase & Sanborn Programme, Sundays, 6 P.M., from CICA. Nelson Eddy and Dorothy Lamour with your favour with their songs; Edgar Bergen and Charlie McCarthy with your laughter with their wit. Versatile Don Ameche "emcees", and lets Charlie McCarthy make love to his guest stars. And it takes a clever dummy to rival Charlie's romancing!

Carlton Morse, author of One Man's Family, heard over CICA Edmonton Wednesdays at 6 o'clock, brought to radio a newspaperman's knowledge of human interest. The Barbour family, whose life story he dramatizes, meets and solves the same problems as you or I. The hopes, the joys, ambitions and tragedies of everyday life are the material with which One Man's Family is built.

"Canada 1938" from CICA each Friday at 8 P.M., is winning much comment about its mixed choir. Four distinct vocal units make up this novel group... a male quartet... a male octet... an octet of male voices... and a harmony trio of girls. Imagine the rehearsal necessary to blend these voices for microphone balance!

Starting Saturday, the weekly newspapers will broadcast a series of radio programmes dedicated to their rural subscribers. Each week a different Editor will send a message about his community, to be broadcast on this programme. Tune in to see how the views of your own editor agree or differ with those in other communities. The time—5.30 p.m. every Saturday.

## DID YOU EVER STOP TO THINK?

Almost every successful business man considers the good with which he has built up through years of continuous newspaper advertising and honest dealings as his one big asset.

A whole lot of cities are long on good starters, but short on good finishers. Too many men are so intent upon admitting their own methods, their

own progress, their own wisdom that they do not have time to observe their own faults.

Some business men have visions of greater things, but in carrying out their plans they forget the Golden Rule and go only far enough to miss their goal of achievement and their plans result only in a mirage.

Classified advertising is considered the most effective means for securing direct results at the lowest costs. In the heart of the average man this venture into higher taxes is a mystery. It brings on little ill and frets. The multitude of taxes upsets the mind and one is worried as to how to pay them and what they are used for. Many of the taxes seem to be caused by dreams of the New Dealers. It is never well to dream except it be in bed—and even then it's likely to end in a nightmare.

\*\*\* Winter car driving is much more dangerous than in the summer. That is the reason why everyone who drives in the winter should be fully insured. See Joe Welch for auto insurance.

Far from being a modern invention, "drinking straws" were used by the ancient Babylonians. The seal of the town of King Hammurabi depicts the drinking of liquids from a pitcher through a tube.

## BORROWING EXPERIENCES

## An Enthusiastic Customer:

A professional man, who was assisted many years ago by a small personal loan obtained at the Bank of Montreal, is still an enthusiastic and loyal customer. He has told many of his friends that the Bank's assistance at a time

of need is one reason for his success. If you need money, your application for a loan, properly secured, will be welcomed by the manager of any one of our 500 branches.

By

J. L. Irwin

(Continued from last week)

At this time a paper was presented at the annual meeting of the Canadian Institute of Mining and Metallurgy by Messrs. Spratt and Taylor of the Petroleum and Natural Gas Division of the Department of Lands and Mines, which surveyed the possibilities of Turner Valley and stressed the potentialities of the west of the field.

Since that date drilling by both old and many new companies has been actively carried out in this section of the Valley.

Following the Turner Valley Royalties discovery five other wells were successfully brought into production which proved that this section of the structure was unquestionably a reservoir for the long sought high grade crude.

These later producing wells were Foundation, and Sterling Pacific, No. 3 which came into production in December, 1936 followed by B. and B. in February, 1937, and Westside and Sterling Pacific, No. 4 in the following month.

Since that date many new wells several with a much greater capacity have been brought into production in this section of the Valley. They are as follows:—Commell, Brown Nos. 1 and 2, Davies No. 3, Firestone, Four Star, Granville, Mercury No. 8, Model, Spooner, Monarch, National No. 1, Prairie, Richland No. 3, Royal Crest, Share, Sterling Pacific, Nos. 5 and 6, West Flank No. 1, Royal Canadian and Three Point. Davies No. 2 of this group was the largest, production in October being 48,992 barrels, Sterling Pacific No. 5 coming second in this month with 39,791 barrels and Sterling Pacific No. 4 third with 31,648 barrels. These figures represent oil actually produced under proration applied.

The proven zone is now some three miles in length and half a mile in breadth. How far north and south this line may be extended is not yet known. The eastern boundary of this area appears to be fairly well established but the western is still uncharted territory.

Alberta's potential production at the moment is approximately 25,000 barrels a day or at the rate of 9,000,000 barrels per year. A quantity sufficient for the requirements of the three prairie provinces and equivalent to one-quarter of the Dominion's consumption.

A viable market now extends from eastern British Columbia to Rainy River in Ontario. Problems in marketing facilities, which at first presented difficulties with the rush of suddenly increased production are beginning to be solved. With the exception of one of the larger marketing companies, contracts with United States producers are not being renewed, refinery extensions are being constructed and additional pipe lines installed. By the spring of 1938 a most encouraging report on increased production and marketing is anticipated.

A most encouraging one can already be given. Largely due to the performance of the Turner Valley Royalties well which came in in June 1936 and which according to reports paid for its drilling within five months, the following increase in Alberta's oil production for 1936 is given:—

1935	1936
Barrels	Barrels
1,263,750	1,320,442

Increase in oil production for the calendar year—1936 over 1935—56,692 barrels.

1936	1937	Increase
Barrels	Barrels	Barrels
1,263,750	1,320,442	56,692

Comparative production increases for the first ten months of 1937 are as follows:—

Month	1936	1937	1938
January	106,171	127,977	226,000
February	96,077	140,510	444,320
March	101,857	161,832	6,997
April	94,280	172,608	7,876
May	97,189	176,697	7,720
June	97,639	191,634	9,999
July	122,771	226,000	103,229
August	124,287	271,898	147,611
September	120,210	261,154	160,944
October	120,638	325,723	205,085
Totals	1,081,699	2,076,538	

Increased oil production for first ten months of 1937 over the similar period for 1936—993,669 bbls.

To this most satisfactory progress there now comes a new encouragement in the improved process of acidizing producing wells with a view to securing increased production.

The cost of such processing is insignificant in comparison to results obtainable and returns have so far proved generous in the extreme.

Expenses involve the installation of tubing in a well plus the purchase of acid. The amount used is generally around 5000 to 6000 gallons. The total cost of this processing is generally recoverable by only a few days' increased production.

The acid, possessing a hydrochloric base and containing an inhibitor for the protection of the metal tubing from corrosion, is injected into the

wells by means of pumps. On reaching the productive horizon it removes obstructions from the porosity of the limestone.

The results of acidization have been most spectacular. Producing wells in this new zone have been increased as a result of this form of processing to two or three times their original potential capacity and many have been subjected to a second treatment.

Popular amendments to both the petroleum and prospecting regulations were made last year. In the latter instance larger areas were granted with reduced fees which offered a distinct encouragement to more intensive geological work. Following the promulgation of these amendments surveys were conducted in different parts of the Province which resulted in a great deal of valuable data being gathered in.

Surveys on a still greater scale are being carried out this year. Research of this nature will result in a more scientific location of drilling sites which, it is hoped, will lead in turn to the opening of new and productive fields.

Petroleum and natural gas leases active during the fiscal year ending March 31st, 1937, numbered 5674 covering an area of 776,605 acres. These figures represent an increase over the preceding year of 2337 in number of leases granted and of 1,102,964 in acreage covered.

Prospecting permits issued for the last fiscal year involved a total area of nearly half a million acres—more than twice the size of a territory secured for this particular purpose during the previous year.

Alberta is underlaid with a petrolierous formation, a fact which has been proven by the drilling of many wells. A large number of these wells while not securing commercial production have nevertheless found showings of oil and gas in most parts of the Province. There is, therefore, ample reason for believing that other productive pools will yet be discovered both in the plains and foothills' area. In addition to the activity in Turner Valley work to a far greater extent than is generally known is being carried on in exploratory fields scattered throughout the Province and twenty-five wells are at present being drilled in those different areas.

New Valley, northeast of Turner Valley, may well develop into an attractive field as a result of discoveries made by its first well drilling in that area. The same may be said of Taber where production is being secured at an approximate depth of 3000 feet. The districts of Wainwright, Ribstone and Red Ouelie all possess producing wells. In the southern plains close to the international border the search is continuing for pools which may prove to be an extension of the Sweetgrass Arch, the productivity of which has been demonstrated in many pools in Northern Montana, Hunter Valley to the west of Olds is receiving encouraging indications of oil and gas and tests of the Pouce Coupe and other northern structures are under way.

Drilling has been resumed by Harvey Bevan at the Montreal Alberta well. This is the deepest well in the Wainwright field, and developments are being closely watched by several companies holding leases here. A large expansion of oil-field work is expected here in the Spring if this well is brought in as a producer.

Mr. Geo. Babb, of Gilt Edge, left this week for Tacoma, Wash., to visit friends for a few weeks.

Save February 14th (Valentine's Day) for the big A.Y.P.A. dance with the big floor show.

His many friends will be glad to know that Gordon Pybus, of Daysland, who was operated on for appendicitis in the hospital there last week is progressing nicely.

After spending a couple of weeks with his parents at the coast for a holiday, Mr. Garth Mills returned home here on Sunday.

Mr. C. Conley, who is in charge of the big "Sportmen's exhibition" in Boston, Mass., was in town for a few days, and while here visited the Buffalo Park gathering material for the exhibition.

Dr. Harvey McClinton, of Harvard University, director of traffic research, in a speech to a safety league meeting, stated that 45,000 people will be killed in Canada and the U.S. in auto accidents during 1938. More than 150,000 will be permanently disabled, and another million and a half will suffer some degree of personal injury. If you can afford to drive you cannot afford to be without insurance. See Joe Welch for auto insurance.

Another of their series of Military Whist parties was staged by the members of the local Rebekah lodge L.O.O.F. on Wednesday last, when there was a real nice turn-out to enjoy the evening. Lunch was served at the close of card playing.

We are pleased to learn that Mr. Joe Richardson, who suffered a sudden heart attack last week, is getting along nicely and improving in health.

Save February 14th (Valentine's Day) for the big A.Y.P.A. dance with the big floor show.

As will be noted on page five this week, The Star has inaugurated still another new feature. Under the head of "The Dial Review" we will give a resume of outstanding programs for each week. Clip these out as time reminders!

Preparations are going ahead for the annual school concert in the theatre on February 8th and all interested should reserve that date.

Mr. and Mrs. Sid Bibby and family, who were away to California on a visit to Mr. and Mrs. Carl Foster there, returned home last week end.

Now is the time to build an extra cupboard, enlarge a closet, lay a new floor, or make other improvements in your home that are necessary for comfort—before you start your Spring house-cleaning. The Atlas Lumber Co. will be glad to assist you to plan these improvements and will give you estimates of the cost free. Joe Welch, mgr.

It is pleasing to see Mr. Ernie Squires around again following his stay in hospital. He is feeling much better, too.

At the hands of the Cofield boys, the Town hall interior has been much improved during the past week by the application of paint and varnish.

America's most daring flyer... Europe's cleverest spy... fighting it out in mid-Atlantic... In a mighty bundle of dynamite dynamite! See "Crack-Up!" at the Elite theatre next Monday, Tuesday and Wednesday.

We are glad to know that both Mr. Bill Stuart and Mr. Joe Mackenzie, who have been patients at the hospital for the past week are now coming along nicely, and expect to return to their home shortly.

The splendid prizes to be awarded in the local bospital this week make a nice showing in the window of the Washburn hardware store; and will no doubt be hotly contested for this week.

Don't take all the risks yourself! Let a good, strong insurance company carry the risk of replacement of your home in case of an unfortunate fire loss during these days of extra firing and heating. Joe Welch handles all the best companies.

Mr. Knut Lindseth who was a hospital patient, has now returned home feeling much better in health.

Mr. Harry Laird journeyed to the city last Tuesday and plans to remain there for a while on business.

Mrs. O. Michon is away to Drumheller for a visit to relatives there for a short stay.

The rugged frames and streamlined mudguards, headlamps and horns of the up-to-date bicycle contain about 25 pounds of steel, mostly tubing and strip steel.

Mr. Don Pawsey, of Edgerton, was in Edmonton last week on business connected with his duties as secretary of Vale M.D.

March is the harvest month in Egypt, Tripoli, Morocco, and India, while in April crops are harvested in Persia, Mesopotamia, Arabia, Asia Minor, Syria, Cyprus and Mexico.

Mr. Chas. Stanger, who has improved in health has now left the hospital and returned to his home at Doka.

Mr. R. H. Rude was a business visitor to the city last week-end. He was accompanied by his son Stanley.

Messrs. Bob Leggett and Syd. Smith were in Edmonton for a day or so on business last week.

Mr. and Mrs. W. C. Fish, who have been staying with their son Frank in town for the past three years, left last Thursday for an extended visit to their old home in Iowa, as well as to other relatives in Illinois and Missouri.

### HEATH

Mrs. J. Touchette and Mrs. Leduc of Greenfield, were called to Montreal owing to the illness of their father.

Mr. and Mrs. Fred Ford were visitors to the city attending the U.F.A. Convention.

Arm Lake annual school meeting took place on Friday afternoon. All officers were re-elected.

The annual meeting of St. Patrick's W.A. was held at the church on Saturday afternoon. Officers elected were Mrs. F. Ford, pres.; Mrs. Herbert, vice-pres.; Mrs. A. Patterson, sec-treas.

The Catholic League are holding a whist drive and dance at the health schoolhouse on Friday, Jan. 28th.

Mr. and Mrs. Pat Herbert and Adelard Touchette motored to Edmonton over the week-end.

No human being escaped the Custer massacre, but one horse did, and on its death it was stuffed and mounted. The mount is now on exhibition at Fort Riley, Kan.
